EXAMINER

BHATIA, AJAY M

ART UNIT

PAPER NUMBER

2145

DATE MAILED: 10/24/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/054,749

Applicant(s)

STORK ET AL.

Examiner

Ajay M. Bhatia

Art Unit

2145

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 January 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-66 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-66 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- ☒ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 4/29/05.
- ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- ☐ Notice of Informal Patent Application (PTO-152)
- ☐ Other: _____.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 23-44 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Rejected claim(s) do not clearly define the claimed invention as a tangible embodiment therefore claim(s) are non-statutory. MPEP § 2105, states that an article of manufacture must be made from raw materials. Applicant may include the limitation "contained on a tangible embodied computer readable medium" to over come this rejection.

Priority

Examiner is unclear as to which claim applicants feels should benefit from priority since the claims are significantly different than the claim of the document it seeks priority from, therefore examiner requests that applicant clearly point to the limitation which seeks priority otherwise priority claims within this application are improper.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section

Art Unit: 2145

351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-66 rejected under 35 U.S.C. 102(e) as being anticipated by Pareschi et al.

(U.S. Patent 6,725,428).

For claim 1, Pareschi et al. teaches, a method of processing a document in a workflow system, the method comprising:

detecting when a document is at a refinable place in a first workflow network, the first workflow network specifying a plurality of operations to be performed on the document including a first operation and a second operation, the refinable place occurring at a location in the first workflow network after the first operation and before the second operation is performed on the document; (see Pareschi et al., figures 4,12, Col. 10 lines 36-46)

determining, when the document is at the refinable place, if a second workflow network specified by the document is permitted to be attached to the refinable place of the first workflow network, the second workflow network specifying one or more operations to be performed on the document; (see Pareschi et al., Col. 10 lines 36-46, Col. 11 lines 24-38)

and if the second workflow network specified by the document is permitted to be attached to the refinable place of the first workflow network, attaching the second workflow network to the refinable place of the first workflow network such that the document is processed according to the second workflow network before the second

operation specified by the first workflow network is performed on the document. (see Pareschi et al., Col. 10 lines 36-46, Col. 11 lines 24-38)

For claim 2, Pareschi et al. teaches, the method of claim 1 wherein the first workflow network is configured by a workflow designer and the second workflow network is configured by an author of the document. (see Pareschi et al., Col. 8 lines 57-65, Col. 9 lines 30-44)

For claim 3, Pareschi et al. teaches, the method of claim 1 wherein detecting when the document is at the refinable place in the first workflow network comprises:

detecting when the first operation has been performed on the document. (see Pareschi et al., Col. 11 line 56 to Col. 12 line 5)

For claim 4, Pareschi et al. teaches, the method of claim 1 wherein determining if the second workflow network specified by the document is permitted to be attached to the refinable place of the first workflow network comprises:

determining permissions information specified for the refinable place; (see Pareschi et al., Col. 10 lines 1-5, Col. 11 line 56 to Col. 12 line 5)

and determining that the second workflow network specified by the document is permitted to be attached to the refinable place of the first workflow if the document satisfies the permissions information specified for the refinable place. (see Pareschi et al., Col. 10 lines 1-5)

For claim 5, Pareschi et al. teaches, the method of claim 4 wherein the permissions information specified for the refinable place is configured by a designer of the first workflow network. (see Pareschi et al., Col. 10 lines 1-5, Col. 9 lines 30-44)

For claim 6, Pareschi et al. teaches, the method of claim 1 wherein determining if the second workflow network specified by the document is permitted to be attached to the refinable place of the first workflow network comprises:

determining permission information associated with the document; (see Pareschi et al., Col. 10 lines 1-5)

and determining that the second workflow network specified by the document is permitted to be attached to the refinable place of the first workflow if the permission information associated with the document permits the attachment. (see Pareschi et al., Col. 10 lines 1-5, Col. 9 lines 30-44)

For claim 7, Pareschi et al. teaches, the method of claim 6 wherein the permissions information associated with the document is configured by an author of the document. (see Pareschi et al., Col. 10 lines 1-5, Col. 9 lines 30-44)

For claim 8, Pareschi et al. teaches, the method of claim 1 wherein attaching the second workflow network to the refinable place of the first workflow network such that the document is processed according to the second workflow network before the

Art Unit: 2145

second operation specified by the first workflow network is performed on the document compresses:

performing at least one operation from the one or more operations specified by the second workflow network on the document before performing the second operation specified by the first workflow network on the document. (see Pareschi et al., Col. 10 lines 1-5, Col. 11 line 56 to Col. 12 line 5)

For claim 9, Pareschi et al. teaches, the method of claim 1 wherein attaching the second workflow network to the refinable place of the first workflow network such that the document is processed according to the second workflow network before the second operation specified by the first workflow network is performed on the document comprises:

identifying a set of one or more workflow networks specified by the document;
(see Pareschi et al., Col. 10 lines 1-5)

identifying a workflow network from the set of workflow networks that satisfies a selection criterion; (see Pareschi et al., Col. 10 lines 1-5)

and processing the second document according to the workflow network identified from the set of workflow networks before performing the second operation specified by the first workflow network on the document. (see Pareschi et al., Col. 10 lines 1-5)

For claim 10, Pareschi et al. teaches, the method of claim 1 wherein the second workflow network attached to the refinable place of the first workflow network comprises a refinable place. (see Pareschi et al., Col. 6 lines 30-41)

For claim 11, Pareschi et al. teaches, the method of claim 1 further comprising:

if the second workflow network specified by the document is not permitted to be attached to the refinable place of the first workflow network:

determining a set of workflow networks attached to the refinable place of the first workflow network; (see Pareschi et al., Col. 10 lines 1-13)

identifying at least one workflow network from the set of workflow networks for processing the document; (see Pareschi et al., Col. 10 lines 1-5)

and processing the document according to the at least one workflow network before performing the second operation specified by the first workflow network on the document. (see Pareschi et al., Col. 9 lines 57-61)

For claim 12, Pareschi et al. teaches, the method of claim 1 further comprising:

if the second workflow network specified by the document is not permitted to be attached to the refinable place of the first workflow network:

determining a first set of workflow networks attached to the refinable place of the first workflow network; (see Pareschi et al., Col. 10 lines 1-5)

based upon permissions information associated with the document, detaching one or more workflow networks included in the first set of workflow networks from the

refinable place such that a second set of workflow networks remain attached to the refinable place; (see Pareschi et al., Col. 11 line 56 to Col. 12 line 5)

identifying at least one workflow network from the second set of workflow networks for processing the document; (see Pareschi et al., Col. 10 lines 1-5)

and processing the document according to the at least one workflow network before performing the second operation specified by the first workflow network on the document. (see Pareschi et al., Col. 10 lines 1-13)

For claim 13, Pareschi et al. teaches, a method of processing a document according to a first workflow network, the first workflow network specifying a plurality of operations to be performed, the plurality of operations including a first operation and a second operation following the first operation, the method comprising:

subsequent to performing the first operation and before performing the second operation, determining if the document is permitted to be processed by a second workflow network specified by the document, the second workflow network specifying one or more operations to be performed on the document; (see Pareschi et al., Col. 10 lines 1-5, Col. 10 lines 36-46, figures 4, 12)

and if the document is permitted to be processed by the second workflow network, processing the document according to the second workflow network before the second operation specified by the first workflow network is performed. (see Pareschi et al., Col. 10 lines 1-13, Col. 11 line 56 to Col. 12 line 5)

Art Unit: 2145

For claim 14, Pareschi et al. teaches, the method of claim 13 wherein the first workflow network is configured by a workflow designer and the second workflow network is configured by an author of the document. (see Pareschi et al., Col. 10 lines 1-5)

For claim 15, Pareschi et al. teaches, the method of claim 13 wherein determining if the document is permitted to be processed by the second workflow network specified by the document comprises:

determining permissions information specified for the first workflow network; (see Pareschi et al., Col. 10 lines 1-5)

and determining that the document is permitted to be processed by the second workflow network if the document satisfies the permissions information specified for the first workflow network. (see Pareschi et al., Col. 10 lines 1-13, Col. 11 line 56 to Col. 12 line 5)

For claim 16, Pareschi et al. teaches, the method of claim 15 wherein the permissions information specified for the first workflow network is configured by a designer of the first workflow network. (see Pareschi et al., Col. 10 lines 1-5)

For claim 17, Pareschi et al. teaches, the method of claim 13 wherein determining if the document is permitted to be processed by the second workflow network specified by the document comprises:

determining permissions information associated with the document; (see Pareschi et al., Col. 10 lines 1-5)

and determining if the document is permitted to be processed by the second workflow network specified by the document based upon the permissions information associated with the document. (see Pareschi et al., Col. 10 lines 1-5)

For claim 18, Pareschi et al. teaches, the method of claim 17 wherein the permissions information associated with the document is configured by an author of the document. (see Pareschi et al., Col. 10 lines 1-5, Col. 9 lines 30-44)

For claim 19, Pareschi et al. teaches, the method of claim 13 wherein processing the document according to the second workflow network comprises:

identifying a set of one or more workflow networks specified by the document' 5
identifying a workflow network from the set of workflow networks that satisfies a selection criterion; (see Pareschi et al., Col. 10 lines 1-5)

and processing the second document according to the workflow network identified from the set of workflow networks before performing the second operation specified by the first workflow network. (see Pareschi et al., Col. 10 lines 1-13)

For claim 20, Pareschi et al. teaches, the method of claim 13 wherein processing the document according to the second workflow network comprises:

performing at least one operation from the one or more operations specified by the second workflow network before performing the second operation specified by the first workflow network. (see Pareschi et al., Col. 11 line 56 to Col. 12 line 5)

For claim 21, Pareschi et al. teaches, the method of claim 13 further comprising:

if the document is not permitted to be processed by the second workflow network:

identifying a set of workflow networks; (see Pareschi et al., Col. 11 lines 24-38)

identifying at least one workflow network from the set of workflow networks for processing the document; (see Pareschi et al., Col. 10 lines 36-46, Col. 11 lines 24-38, figures 4, 12)

and processing the document according to the at least one workflow network before performing the second operation specified by the first workflow network. (see Pareschi et al., Col. 11 lines 24-38)

For claim 22, Pareschi et al. teaches, the method of claim 13 further comprising:

if the document is not permitted to be processed by the second workflow network:

identifying a first set of workflow networks; (see Pareschi et al., Col. 10 lines 36-46, //s 4,12)

Art Unit: 2145

based upon permissions information associated with the document, deleting one or more workflow networks from the first set of workflow networks; (see Pareschi et al., Col. 10 lines 1-13)

identifying at least one workflow network from workflow network remaining in the first set of workflow networks for processing the document; (see Pareschi et al., Col. 10 lines 36-46, Col. 11 Col. 24-38, Col. 10 lines 1-13)

and processing the document according to the at least one workflow network before performing the second operation specified by the first workflow network. (see Pareschi et al., Col. 11 lines 24-38)

Claims 44-66 list all the same elements of claims 1-22, but in product and system form rather than method form. Therefore, the supporting rationale of the rejection to claims 1-22 applies equally as well to claims 44-66.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See attached UPSTO 892 (if appropriate).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ajay M. Bhatia whose telephone number is (571)-272-3906. The examiner can normally be reached on M-F 8:30 am - 5:00 pm.

Art Unit: 2145

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal Dharia can be reached on (571)272-3880. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
